

Environmental Policy

Environmental Policy

Nordanic A/S acknowledges and accepts that regard for the environment is important. We want to contribute to protecting nature and the environment so that the community can develop on a sustainable basis with respect for people's living conditions and for protection of animal and plant life. As a responsible company, Nordanic A/S will continuously improve its efforts for the external environment by:

- Minimising resource usage, including energy for heating, transport, power consumption, water consumption, substances and materials
- Disposing of waste products in a responsible manner and promote recycling
- Aiming for a good dialogue with the authorities and visitors on environmental impacts
- Encouraging suppliers to provide environmentally sound products and services
- Communicating openly, both internally and externally about our environmental responsibilities
- Instructing members of staff to act in accordance with this policy.
- Committing ourselves to complying with current environmental legislation.

Management is responsible for compliance with the environmental policy
